

Trees of Campland

Lemon Scented Gum Tree

CORYMBIA CITRIDOROA
NATIVE TO AUSTRALIA

Light green leaves when crushed smell of citronella and lemon. Oil distilled from the leaves is used in perfume and as a mosquito repellent. Smooth trunk varies in color from white to coppery pink to pale yellow. Grows up to 30 ft tall. Rate of growth up to 30+ inches per year.

Mexican Fan Palm

MEXICAN FAN PALM
FROM WESTERN SONORA & BAJA CALIFORNIA, MEXICO

This ornamental palm can live up to 150 years. The palms are shaped like fans. The leaves have been used for roofs, baskets and candles while the fiber was used in making cord. Grows up to 100 feet tall.

Pomegranate

PUNICA GRANATUM
NATIVE TO MEDITERRANEAN REGION

This fruit-bearing deciduous shrub grows between 16-33 ft. tall. Pomegranates are used in baking, cooking, juice blends, meal garnishes, smoothies, and alcoholic beverages, such as cocktails and wine.

Japanese Black Pine

PINUS THUNBERGII
NATIVE TO COASTAL AREAS OF JAPAN

Trunks and branches are trained from a young age to be elegant and interesting to view. It is one of the classic bonsai subjects.

Southern Magnolia

MAGNOLIA GRANDIFLORA
NATIVE TO SOUTHEASTERN UNITED STATES

Medium to large evergreen with a single trunk. Known for its showy large, waxy, citrus-scented white flowers. This tree has a long history in the Southern United States.

Campland on the Bay® planted over 1,100 trees in the early 1970s. These 36 varieties of mature trees benefit the environment by:

- Supporting wildlife by supplying habitat and food for birds, insects, and other wildlife.
- Providing oxygen and taking in carbon dioxide through the process of photosynthesis.
- Absorbing massive amounts of carbon. 100 trees remove 53 tons of carbon dioxide and 430 pounds of other air pollutants per year.
- Helping to control climate by moderating the effects of the sun, rain, and wind.
- Enhancing the aesthetics and providing shade for the resort.
- Preserving and enhancing soil.
- Producing fruits and nuts.

Torrey Pine

PINUS TORREYANA
NATIVE TO TROPICAL AMERICAS

It is a critically endangered species growing only in San Diego County. Broad, open-crowned pine tree growing to 25-56 ft. tall in the wild.

Indian Laurel Fig/Chinese Banyan

FICUS INDICA
NATIVE TO CHINA, TROPICAL ASIA

Member of the fig tree family, it is widely planted as a shade tree. Used in traditional medicine. In Japan, the bark, aerial roots, and dried leaves are used against pain and fever. In China, it is used for the flu, malaria, bronchitis, and rheumatism. It is an antioxidant and has antibacterial, anticarcinogenic and anti-diabetic agents.

Jacaranda

ACIARANDA MIMOSOIDES
NATIVE TO TROPICAL AMERICAS

Known for their fragrant purple flowers in the spring and summer. Name is South American origin, meaning fragrant. The wood has been used in dyeing and in medicine.
